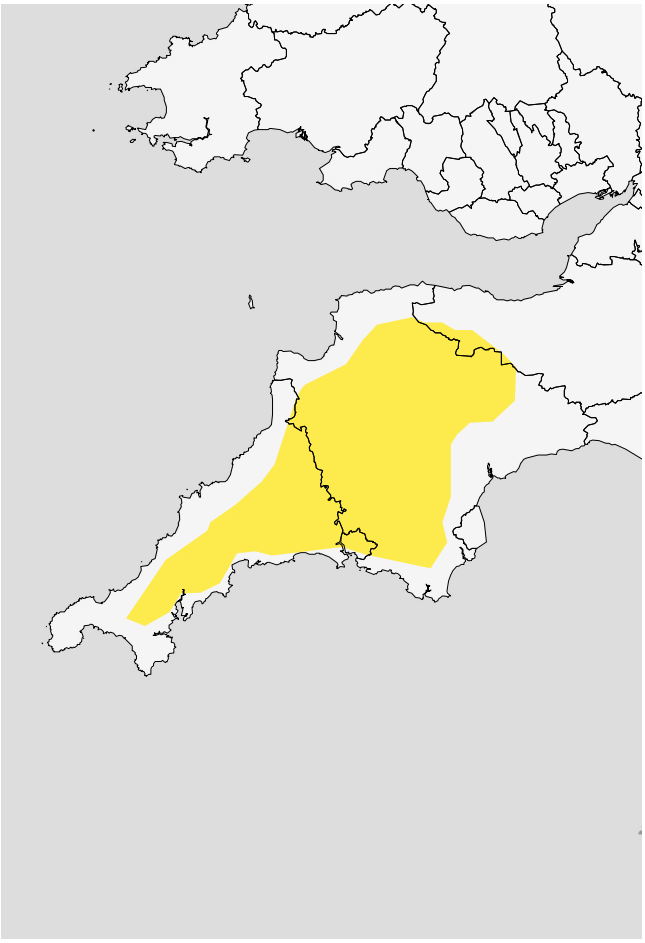
Yellow warning
Ice

Between
18:00 Thu 31 Dec 2020 and
09:00 Fri 1 Jan 2021



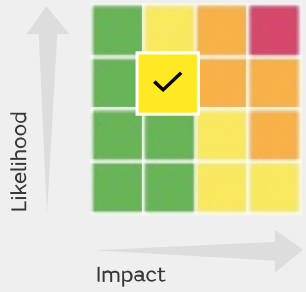
Following heavy showers, wet surfaces are likely to freeze quite quickly, leading to ice, especially where untreated.

What to expect

- Icy patches likely to form on some untreated roads, pavements and cycle paths
- Increased chance of injuries and accidents due to these conditions

Further details

Showers continue at present, with some heavy hail, as well as sleet and hill snow. With temperatures already low, and falling steadily after dusk, ice looks likely to form on many untreated surfaces. Early in the night further showers may wash off applied grit and salt, increasing the likelihood overall.



Medium likelihood of low impacts

Issued at 16:20 Thu 31 Dec, 2020
